

- Rev 1:
Added analog out opamp circuits.
- Rev 2:
Relaid out power planes.
Changed opamp gain resistors
Changed opamp circuits to correct jumper-selectable gain
- Rev 3:
Swapped +5v and Gnd on Voltage Regulator.
Added decoupling caps to LM324 ICs.
- Rev 4:
Changed layout of decoupling capacitors to allow larger and smaller centers for pins. Swapped pins 12 & 13 on opamps.
